2. A quote and drawings will be prepared \& once accepted the job will be booked in.
3. Installation begins. You will be updated on progress and expected finish date.
4. Project is completed and site is cleaned \& in working order.

## FOOTINGS

For new Tennis or Multipurpose courts, we often install posts before the court is laid, which allows the slab to incorporate the posts. Otherwise posts can be installed hard up against but outside the slab.

Typically posts are 700 mm in-ground and 800 mm in-ground for gates and corners.

## CHAINWIRE OPTION

50mm diamond $\times 2.5 \mathrm{~mm}$ gauge Black PVC coated (most common).

We specialise in fencing for a wide range of sporting facilties including Tennis Courts, Football fields, multipurpose courts, Cricket nets, Baseball fields and more.

Generally, Fencing for Sporting Facilities is Chainwire with black being the most common colour option.

## HEIGHT

Tennis Court and Multipupose Court fencing is usually at 3000 mm or 3600 mm high with Football and Baseball fields typically at 900 mm or 1200 mm high.

## FINISH

Black (most common) or galvanised.

## HORIZONTAL RAILS

Usually 32 nb ( 42 mm OD) top and bottom rails are installed, but tensioning wire can also be used as a lower cost option.

## QFence.

## SPORTING FACILITIES FENCING

Chainwire infills on the side of Multipupose Courts at a Primary School.

Chainwire fencing for a Basketball Court and Baseball field.
